

Open OnDemand for Meluxina

User Guide.

Aaron Nugent

Version 1.0.1

What is Open OnDemand?

A browser-based portal that gives researchers, students, and industry professionals remote web access to HPC systems.

Zero Installation

Run Open OnDemand entirely in your browser. No client software, no command line required.

Easy To Use

Start computing immediately. A simple interface makes Open OnDemand easy to learn and use.

Compatible with Any Device

Launch on any device with a browser. Even a phone or tablet.

Low barrier to entry

Empower users of all skill levels by offering an alternative to command-line interface.

Open source

Gather knowledge from their large open-source community.

Why Open OnDemand?

Key Features

-  **Web-Based Shell** — full terminal in the browser, no SSH client needed
-  **File Manager** — upload, download, edit, and manage files across your HPC storage systems
-  **Project Manager** — build, submit, and monitor batch jobs through an intuitive interface
-  **Interactive Apps** — launch Jupyter, RStudio, MATLAB, VS Code, and more directly on compute nodes
-  **Multi-Cluster Support** — a single OOD deployment can serve multiple HPC clusters

How to connect

Go to <https://portal.lxp.lu/> or

- Home Directory
- /mnt/tier2/project/p200
- /mnt/tier2/project/p200
- /mnt/tier2/project/p200
- /mnt/tier2/project/p200
- Scratch /mnt/tier1/project/p200

Servers

 Jupyter Notebook RStudio Server

Desktop version: v0.2.2

This app will launch an interactive desktop on one or more compute nodes. You will have full access to the resources these nodes provide. This is analogous to an interactive batch job.

Software stack

env/release/2025.1

This defines the version of Python you want to load.
